Best Renovation Solution of Access Control System for Old Community

Renovation Solution with Traditional Access Control Equipment for Old Community

Paralysis of Access Control Equipment of Old Community

- >End of product lifetime
- >Equipment off production
- >Manufacture bankruptcy
- >Improper maintenance

The Renovation of Traditional Access Control

- >Wiring problem
- >High construction cost
- >Household delivery section
- >Complicated and time-consuming workload

The Outcome of Traditional Renovation

- >Terminate the renovation and back to traditional security mode
- >The renovation will be half-stopping and pending to uncompleted project
- >Overcome obstacles and complete the renovation, but will fall into the same trap in a few years

SIP Access Control & Intercom Equipment

The Best Renovation Solution

- >High compatibility and standardization
- >Advanced and mature technology
- >Utilize the existing network resources
- >Easy maintenance
- >Flexible system with diversified configuration
- >Low renovation cost
- >Easy and quick construction
