# Community Solution

Fanvil solution for intelligent communities, aiming at pain points of old communities involving traffic, parking, security, life, environment, and other scenes, realizes intelligent application of public areas including intelligent elevators, unmanned parking lots, unmanned pedestrian posts, building entrances and exits, monitoring centers, creating more convenient and efficient management, safer and more comfortable living environment.

It can greatly reduce the cost of operation and maintenance, and increase the overall revenue by improving the community management and operation efficiency, emergency response-ability, multi-party coordination and so on, promoting the digitalization of community communication.

## POWERFUL FUNCTIONS
