

Station Solution

The solution enables service center to monitor and manage all the intelligent security and communication terminals at station. The assistant intercoms can be installed at the station platform, the hall and the entrance for emergencies. Passengers can get efficient help by pressing the intercom. Simple deployment and maintenance of the solution effectively maximize the operational efficiency of stations.

Solution Highlights

Simple Deployment

The solution is very easy for the installation, wiring, and deployment, completely following simple dialing rules of traditional telephones.

High Scalability

The solution realizes efficient communication by integrating IP phone, intercom and video door phone.

High Reliability

HD voice ensures smooth communication, and the devices can work perfectly in extreme weather conditions with high reliability.

Cloud Maintenance

Users can remotely maintain the system online, reducing the cost of labor maintenance.

Instant Response

The solution realizes the quick response and long-distance control for an emergency to enhance the quality of service.

High Security

Enterprise-level encryption mechanism is adopted to guarantee the security of user data and protect customer privacy.

POWERFUL FUNCTIONS

Intercom

Multi-party intercom can be realized between the service center, guards and passengers by one-click call.

Video Linkage

The image of connected IP camera could be displayed during the intercom call.

External Call

Input common contact information on the console, and call the selected contact quickly on the touch screen.

Emergency Consultation (Meeting Mode)

Other parties like service center or guards can be invited to participate in the multi-party consultation for better communication.

Broadcast

Call broadcast, emergency broadcast and real-time broadcast.

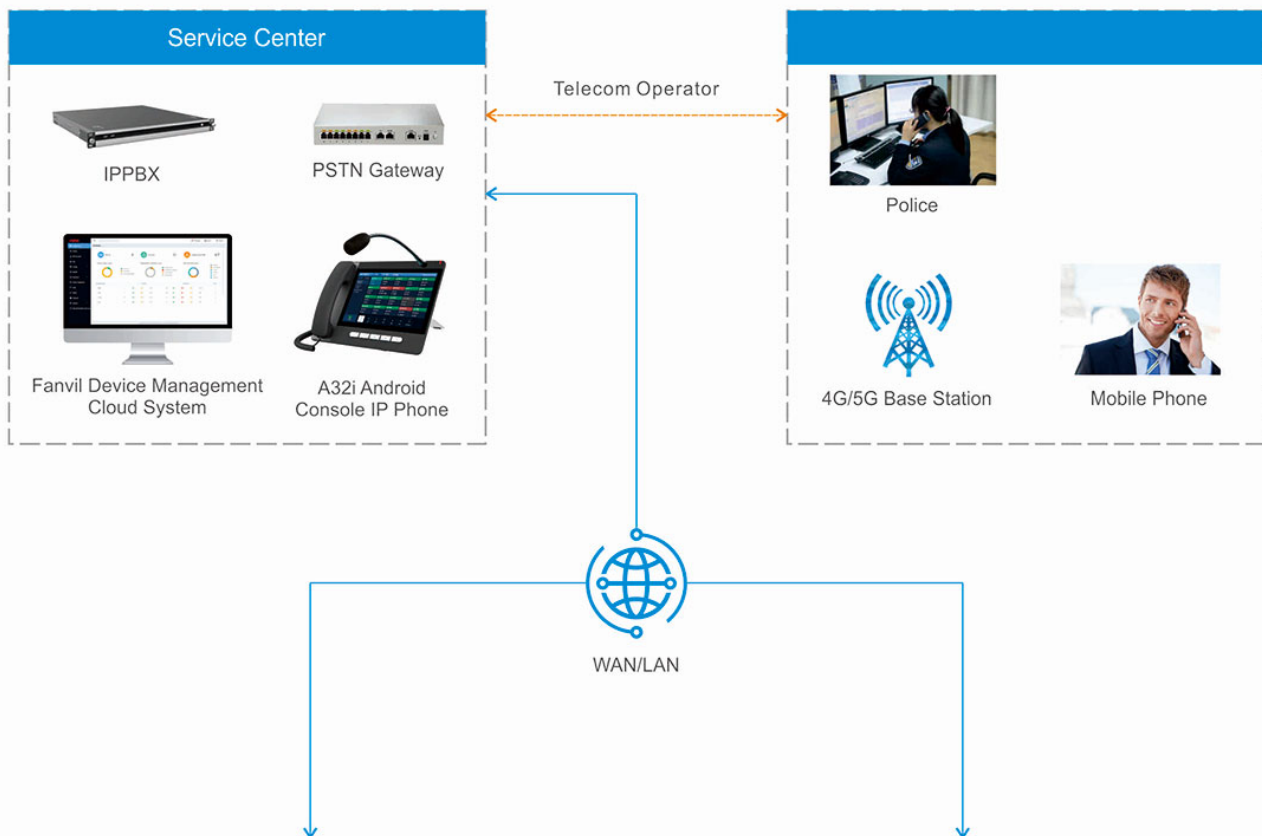

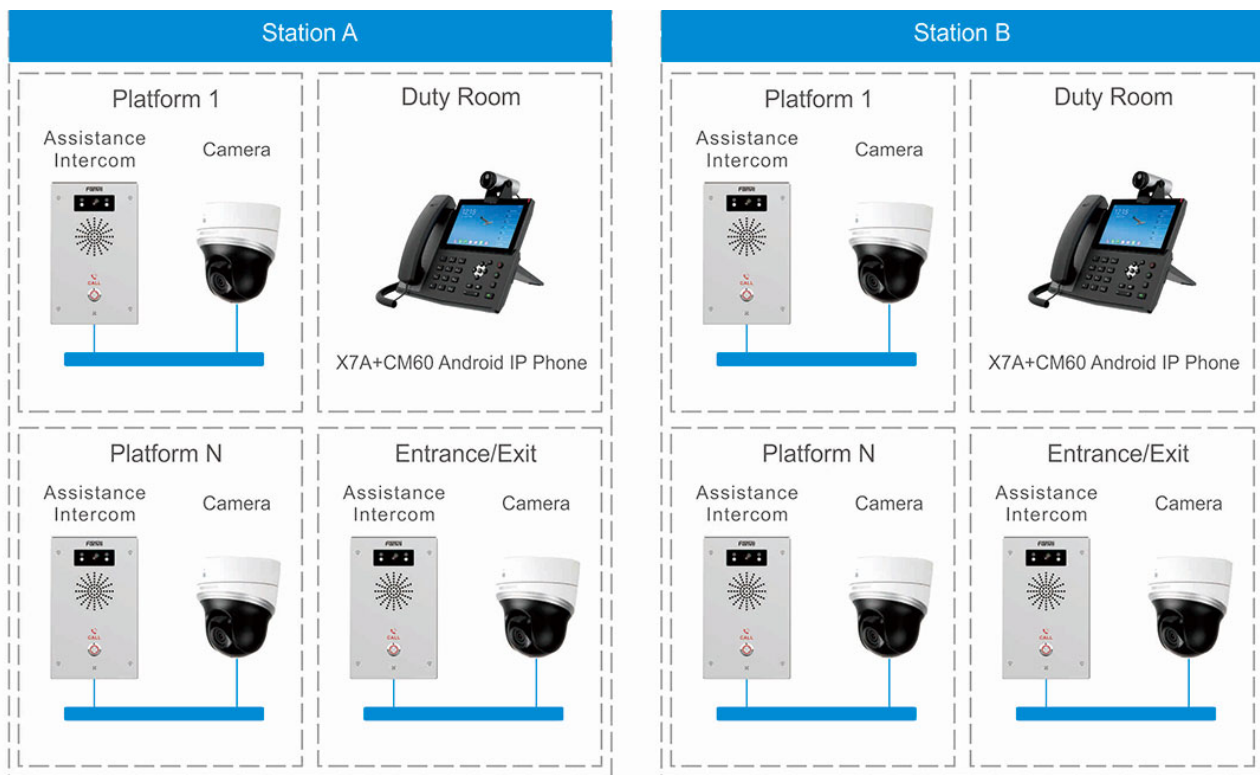

Emergency Help

Passengers can get efficient help from the service center by pressing the intercom for emergencies.

DIAGRAM

The diagram below illustrates how this solution effectively integrates the console IP phone, intercom and access control for stations.
