Supermarket Chain Solution

The solution enables the headquarter to realize remote management of the subordinate supermarket chains, and it also promotes supermarkets to easily hold promotional activities. Multi-party consultation can be realized between headquarters, supermarket chains, and other subordinate enterprises, improving communication efficiency. Simple deployment and maintenance of the solution effectively maximize the operational efficiency of supermarket

Solution Highlights The state of the state

Simple Deployment

The solution is very easy for the installation, wiring, and deployment, completely following simple dialing rules of traditional telephones.

High Scalability

The solution is easy to be set up in both LAN and WAN. It offers stable HD audio/video communication experience even in the environment with unstable network.

High Reliability

HD voice ensures smooth communication, and the devices can work perfectly in extreme weather conditions with high reliability.

Cloud Maintenance

Users can remotely maintain the system online, reducing the cost of labor maintenance.

High Security

Enterprise-level encryption mechanism is adopted to guarantee the security of user data and protect customer privacy.

High Efficiency

The solution realizes the quick response and long-distance control for an emergency to enhance the quality of service.

POWERFUL FUNCTIONS

Intercom

Multi-party intercom can be realized between the monitoring center, enterprises, guards and offices by one-click call.

Video Linkage

The image of connected IP camera could be displayed during the intercom call.

External Call

Input common contact information on the console, and call the selected contact quickly on the touch screen.

Alarm

Emergency alarm and video linkage will be triggered once the intercom is pressed.

Emergency Consultation (Meeting Mode)

Other parties like guards or staff can be invited to participate in the multi-party consultation for better communication.

Broadcast

Call broadcast, emergency broadcast and real-time broadcast.

DIAGRAM

The diagram below illustrates how this solution effectively integrates the console IP phone, intercom and access control for supermarket chains.
